Your partner in the business of printing, luxury packaging and security printing features

45 years of experience at your service, with a large range of different combined technologies, to meet the highest demands of innovation and quality for engraved and etched tools, mould making and security printing. A special enterprise, timeless, with the « savoir-faire » for the luxury design and graphic industry.

High secure and brand protection

Based on a geometrical achromatic image we produce high resolution stamps in the deepness of 15 – 25 microns and very small linewidths. With this stamp you can protect your brand on packaging material, like carton,paper, plastic, fine leather. Generally it can beused with any kind of foil. Some parameters as colour or the foil construction can have more or less influence on the quality of the stamped shadow secure image. We create the end design in our artwork department or make the necessary modifications of delivered artworks for technical reasons.

New : Shadow Secure
